### Potential Health Effects:

Eyes:	May cause irritation
Skin:	May cause irritation or allergic skin reaction
Ingestion:	May cause irritation
Inhalation:	May cause respiratory irritation, allergy or asthma symptoms or breathing difficulties if inhaled.
Chronic:	Causes damage to the lung, the kidneys and the liver through prolonged or repeated exposure. Route of exposure: inhalative. Nickel and nickel compounds may cause a form of dermatitis known as nickel itch. They may also cause intestinal disorders, convulsions and asphyxia. Airborne nickel contaminated dusts are regarded as carcinogenic to the respiratory tract. Inorganic bromides may produce depression, emaciation and in severe cases, psychosis and mental deterioration. Bromoderma, a bromide rash, often occurs when bromide inhalation or administration is prolonged. This rash is usually found on the face and resembles acne and furunculosis.
